No. 1905/36 - FRIDAY, MARCH 13, 2015

(Published by Authority)

PART I : SECTION (I) — GENERAL

Government Notifications

L.D.B. 11/81

FOOD ACT, No. 26 OF 1980

REGULATIONS made by the Minister of Health in consultation with the Food Advisory Committee under Section 32 of the Food Act No. 26 of 1980.

DR. RAJITHA SENARATNE,
Minister of Health and Indigenous Medicine.

Colombo,
28th January, 2015.

Regulations

1. These Regulations may be cited as Food (Sweeteners) Regulations 2014 and shall come into operation with effect from 01st July 2015.

2. No person shall use any sweetener in or on any food specially prepared for infants or young children.

3. (1) No person shall import, store, distribute, transport, use, sell, expose or advertise for sale any sweetener other than the sweetener specified in Column II of the Schedule I hereto.

(2) No person shall use in or on any food more than the maximum usable dose specified in the corresponding entry in Column III of the Schedule I hereto.

4. Every person shall ensure that if any food to which a combination of more than one permitted sweetener are to be an admixture, the total of their percentages do not exceed hundred.

For the purpose of this regulation, the quantity of each such sweetener present in such food shall be expressed as a percentage of the maximum quantity of that sweetener appropriate to that food.

5. Where a permitted sweetener or a combination of permitted sweeteners is used in or on any food, there shall be written on the label of the package containing such food -

- (a) a description “contains permitted sweeteners "X" and "Y" and substituting for the letter (s) "X" and "Y" the name (s) of any permitted sweetener used in or on any such food ;
- (b) a warning “Excessive consumption may induce laxative effects” when it contains polyols (Sorbitol, Xylitol, Lactitol, Mannitol, Maltitol, Erythritol) or Isomalt ; and
- (c) when aspartame is present, the warning “Shall not be used by phenyl ketonurics” and “Not recommended for children.”

6. Every warning or description referred to in Regulation 5 shall be written in a clear and legible manner and shall not be hidden, obscured or interrupted by any other written or pictorial matter.

7. (1) The maximum usable dose specified in Column IV of the Schedule I hereto shall be the maximum amount in milligrams of the permitted sweeteners per kilogram of that food, which is ready to eat and been prepared according to any instructions for use.

(2) The maximum usable dose of polyols (Sorbitol, Xylitol, Lactitol, Mannitol, Maltitol, Erythritol) and Isomalt shall be in accordance with good manufacturing practice at a level not higher than is necessary to achieve the intended purpose.

8. The permitted Steviol glycoside extracts shall be in the substances specified in Column I of the Schedule II hereto and the conversion factor shall be as specified in Column II in the corresponding entry of the Schedule II.

9. The calculation of the steviol equivalent for a Steviol glycoside shall be as specified in the Schedule III hereto.

10. Food (Sweeteners) Regulations 2003 made under the Food Act, No. 26 of 1980 published in the *Gazette Extraordinary* No. 1323/1 of 12th January 2004 is hereby rescinded.

11. In these regulations, unless the context otherwise requires -

“Children” means persons under age of twelve years ;

“energy reduced” means that the food to which it refers has an energy value reduced by at least thirty percent as compared with the original or a similar preparation ;

“food” has the same meaning as in the Food Act, No. 26 of 1980 ;

“infants” means children under the age of twelve months ;

“sweetener” means any food additive that is used or intended to be used to impart a sweet taste or as a tabletop sweetener, and does not include carbohydrate sugars ;

“with no added sugar” means that food to which it refers does not contain any of the following —

- (i) added monosaccharides ;
- (ii) added disaccharides ; and
- (iii) other added food used for its sweetening properties ;

“table top sweetener” means saccharin or sodium and calcium salts of saccharin, aspartame, acesulfame K, sucralose, neotame and steviol glycoside ; and

“young children” mean children between one and three years

(Regulation 3(1) and 3(2))

Note 1 : * as steviol equivalents

SCHEDULE II

(regulation 8)

	Column I	Column II
	Steviol glycoside	Conversion factor
1.	Steviol	1.00
2.	Stevioside	0.40
3.	Rebaudioside A	0.33
4.	Rebaudioside B	0.40
5.	Rebaudioside C	0.33
6.	Rebaudioside D	0.28
7.	Rebaudioside F	0.34
8.	Dulcoside A	0.40
9.	Rubusoside	0.50
10.	Steviolbioside	0.50

SCHEDULE III

(regulation 9)

1. Calculation of Steviol equivalent :

$$[SE] = CF \times [SG]$$

Where

CF = Conversion Factor as listed in column II of Schedule II for the corresponding steviol glycoside in column I of Schedule II

[SG] = concentration of individual steviol glycoside

[SE] = concentration as steviol equivalents

2. Examples for calculation of steviol equivalent :

2.1 Example of calculation of steviol equivalents for a single glycoside :

A preparation of 100 mg/kg of Rebaudioside B contains $100 \times 0.40 = 40$ mg/kg steviol equivalents.

2.2 Example of calculation of steviol equivalents for a mixture of glycoside :

For a preparation containing 100 mg/kg of a mixture of 90% Stevioside, 5% Rebaudioside B and 5% Rebaudioside A, the steviol equivalent is

$$[(0.9 \times 0.40) + (0.05 \times 0.40) + (0.05 \times 0.33)] \times 100 = 39.65 \text{ mg/kg}$$

2.3 Example of calculation for maximum permitted level of a steviol glycoside preparation :

To calculate the maximum permitted level of a steviol glycoside preparation which contains 90% Stevioside, 5% Rebaudioside B and 5% Rebaudioside A, in a food where the permission is 160 mg/kg (steviol equivalents).

To determine the equivalence for this preparation :

$$[0.90 \times (160 / 0.40)] + [0.05 \times (160 / 0.40)] + [0.05 \times (160 / 0.33)] = 404 \text{ mg/kg.}$$

03 - 859
